PROFESSIONAL EXPERIENCE

Card Inc. | Cagayan

Account Officer

May 2022 - March 2023

- Streamlined daily payment collection processes, ensuring timely processing and accurate record-keeping for member accounts.
- Facilitated withdrawals, deposits, and loan management, enhancing client financial well-being.
- Assisted clients with convenient and efficient financial solutions supported by personalized assistance and expert guidance.

PROJECT WORK

Online Store App | Developer | [Repo](#) | [Live](#)

2024

A Ruby on Rails application that a customer can add to a cart, checkout, cancel, and refund an order.

- Optimized data retrieval in the web app by addressing N+1 queries, resulting in 20% faster load times.
- Developed an image upload feature for inventory assets using Active Storage and integrated AWS S3 for production storage.
- Implemented payment processing for products using the Paymongo API, enhancing the purchasing experience.
- Enhanced user experience with lazy loading techniques, improving page responsiveness.
- Created a daily orders chart in the admin dashboard using the Chartkick gem, providing visual insights into monthly sales data.

Stock App | Developer | [Repo](#) | [Live](#)

2024

A Ruby on Rails application where registered users can buy and sell stocks.

- Implemented authentication with Devise gem, restricting transactions to admin-approved users and integrating OTP for cash in/out operations.
- Integrated Chartkick gem to visualize stock data, displaying total investments per stock via pie charts and historical prices via line charts.

Slack App | Developer | [Repo](#) | [Live](#)

2023

A React application where registered users are able to send and receive messages and create channels.

- Implemented Context API for state management, accelerating app development by 30%.
- Enhanced user experience by implementing Lazy Loading improving mobile view responsiveness.
